SECURING DATA IN MOTION

SAFEblade 1010

Add security to your network with ultra-low latency encryption

10Gbps full duplex

SAFEblade 1010 secures data between network endpoints on LAN and WAN interfaces.

Designed for flexibility, SAFEblade 1010 can work with any third-party IPsec encryptors already in your network to meet a wide range of network security needs.

5,000x lower latency

Protect your data without sacrificing speed. Hardware-accelerated encryption has up to 5,000 times lower latency than many software-only solutions.

Hardware-enforced core network security

Sitehop SAFEblade 1010 is part of an encryption and decryption system providing an ultra-low-latency solution for securing critical network data in motion.

10x less power

Reduce your security carbon footprint with energy-efficient hardware that uses up to 10 times less power than software-only solutions.
