

# SAFEmini

## Add security to your network with an ultra-low latency encryption solution

**Protect your data without sacrificing speed.** SAFEmini hardware-accelerated encryption is up to 500 times faster than software-only solutions.

**Encryption that fits in your pocket**  
A compact, credit-card-sized device that delivers 1Gbps encryption and network-edge security, the SAFEmini is part of the SAFE Series, a full-stack encryption solution for enterprise networks.

**Ultra-low latency**  
Sitehop SAFEmini is part of the SAFEcore encryption and decryption system, which provides an ultra-low-latency solution for securing critical network data in motion at the network edge.

### Use less energy

Save energy with our low-power SAFEmini, which consumes less than 10 watts - less than today's traditional end-user security appliances.

### Ready for Post-Quantum Cryptography

Quantum-resistant now and post-quantum cryptography compliant in 2025.
