

SAFEmini

Add security to your network with an ultra-low latency encryption solution

Protect your data without sacrificing speed.

SAFEmini hardware-accelerated encryption is up to 500 times lower latency than software-only solutions.

Encryption that fits in your pocket.

A compact, credit-card-sized device that delivers 1Gbps encryption and network-edge security, the SAFEmini is part of the SAFE Series, a full-stack encryption solution for enterprise networks.

Ultra-low-latency

Sitehop SAFEmini is part of the SAFE Series encryption and decryption system, which provides an ultra-low-latency solution for securing critical network data in motion, at the network edge.

Use less energy

Save energy with our low-power SAFEmini, which consumes less than 10 Watts - less than today's traditional end-user security appliances.

Ready for Post-Quantum Cryptography

Quantum-resistant now and PQC compliant in 2025
