SECURING DATA IN MOTION

SAFEmini

Future-proof your network security
with ultra-low latency PQC encryption

Protect your data without sacrificing speed.
SAFEmini hardware-accelerated encryption is up to 500 times lower latency than software-only solutions.

Encryption that fits in your pocket.
A compact, deck of cards-sized device that deliveres 1Gbps encryption and network-edge security, the SAFEmini is part of the SAFE Series, a full-stack encryption solution for enterprise networks.

Ultra-low-latency
Sitehop SAFEmini is part of the SAFE Series encryption and decryption system, which provides an ultra-low-latency solution for securing critical network data in motion, at the network edge.

Future-proof Post-Quantum Cryptography
PQC compliant cryptography ensures the highest level of security for your data in motion.

Crypto Agility
Change encryption standards using our remote, secure upgrade

Use less energy
Save energy with our low-power SAFEmini, which consumes less than 10 Watts - less than today's traditional end-user security appliances.

Centrally Managed
Manage SAFEmini from a central location with Sitehop SAFEnms.

SAFEmini will be available in the second half of 2025
