# Sitehop SAFEnms

Add enterprise-grade network management to your low-latency Sitehop full-stack PQC encryption solutions

Sitehop's enterprise network management system manages your fleet of multi-tenanted encryptors.

Configure user's certificates and permissions in minutes, or Sitehop can pre-load SAFE Series devices so they arrive on site ready for installation. Then, manage your fleet of multi-tenant SAFE Series encryptors from a centralised system.

- Single sign-on
- Centralised dashboard
- Easy-to-use streamlined platform
- Certificate management
- Logging and auditing

Sitehop Cloud
Manage your SAFE Series encryption and decryption system from a central location.

Private Virtual Cloud
Use your own private virtual cloud to host Sitehop SAFEnms

Rest API
Easily integrate the features of Sitehop SAFEnms into your own OSS/BSS or other management system.

On-Premise
Sitehop SAFEnms can be deployed using Docker and run locally on your management network for top level security and control.
